

To Whom It May Concern,

Avid Sports have been working with Neylan Architecture since March 2011 to evolve a concept to deliver a state of the art golf and leisure facility to Brisbane Airport which included a golf driving range, mini golf, clubhouse and retail facility that incorporates advanced swing analysis technology.

Neylan Architecture played an integral role in developing the overarching master plan for the facility that considered our budget and operating objectives while working within strict planning guidelines of the Brisbane Airport Corporation.

The Golf Central clubhouse is a mixed-use facility that will cater for people of all ages and Neylan Architecture were able to translate our broad development ideas into an achievable and innovative design solution.

Neylan Architecture was able to successfully navigate the difficult and often conflicting bureaucratic processes to ensure our desired outcome was achieved. This conscientious and professional work ethic was also extended to the coordination of the numerous consultants involved with the project.

Neylan were able to synthesise the stringent requirements of the Golf Central with an aesthetically functional facility, within tight budgetary and time constraints.

We would recommend Neylan Architecture, as they are a firm, which have exceeded our expectations, and we look forward to working with them again in the future.

Kind regards
